

Demonstration of an innovative fine crushing method for glass and alternative cullet in flat glass production

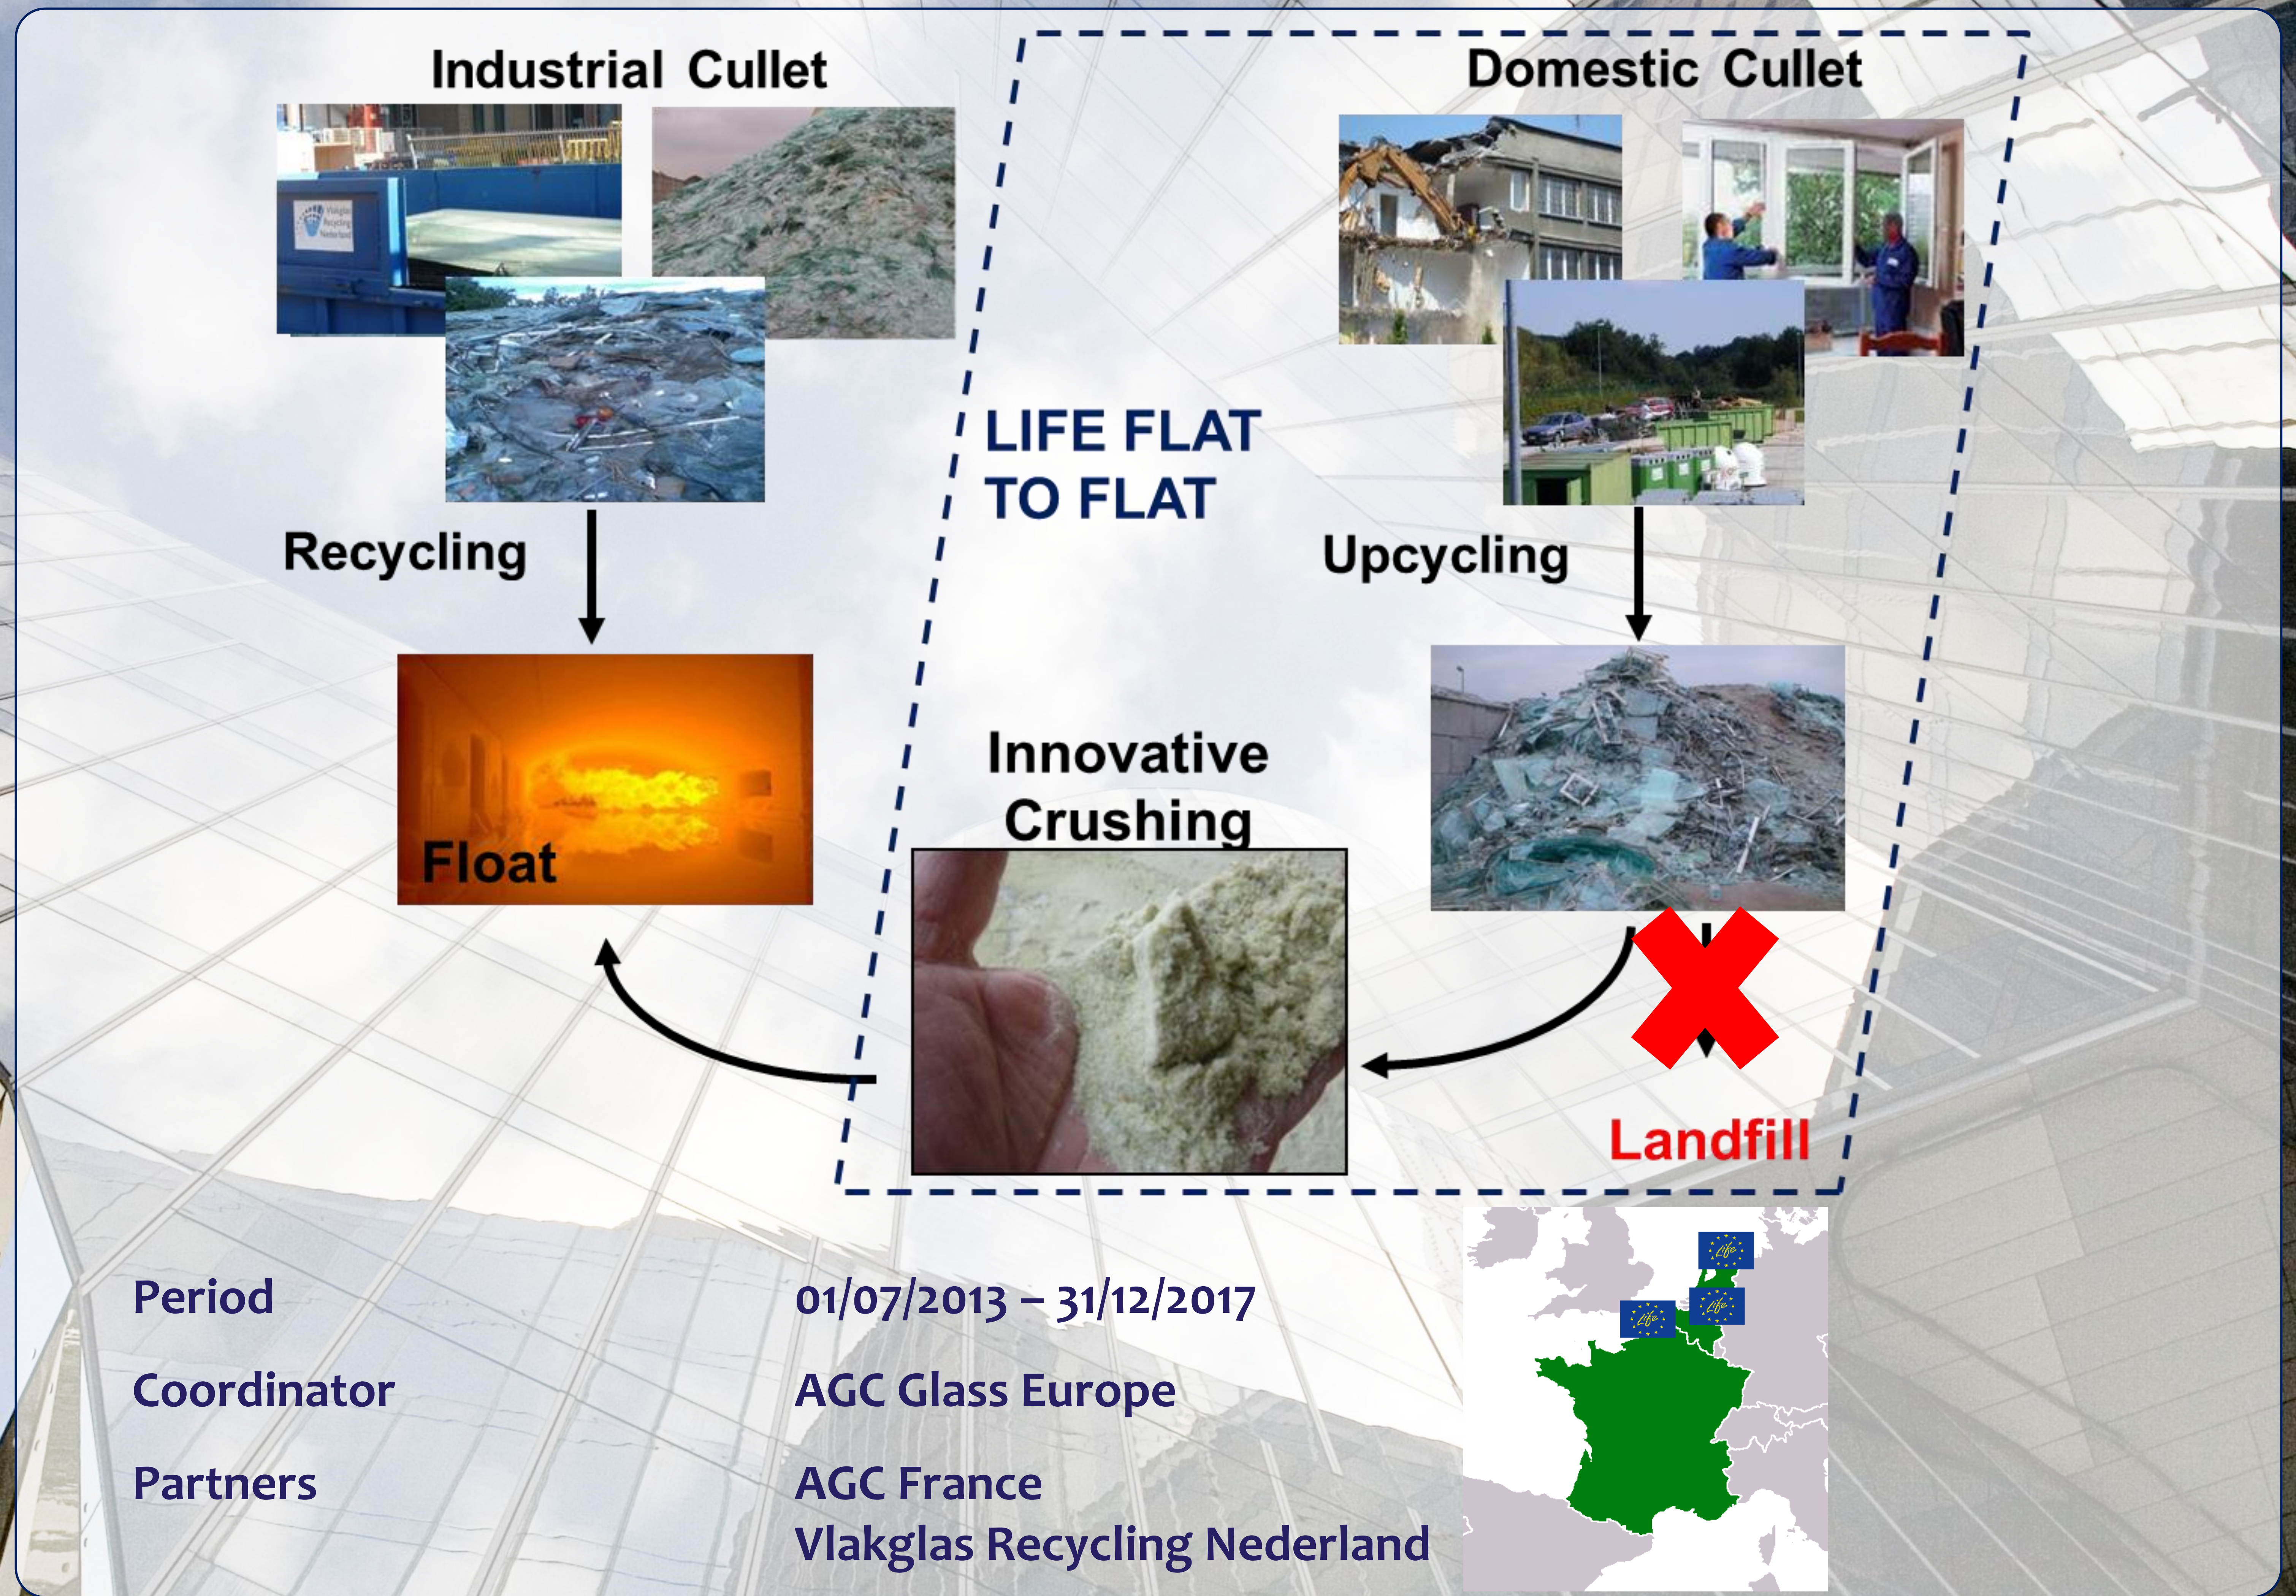

LIFE FLAT TO FLAT

LIFE12 ENV/BE/000214

Vlaskglas Recycling Nederland 

Environmental objectives

- Replacing up to 25% of raw materials by re-/upcycled waste
- Lower energy consumption by 5%
- Reduce CO₂ emissions by 12%

Innovative aspects

- Innovative processing method will allow use of waste materials (high CSP content) for high-value applications (coloured and clear flat glass)
- Setting up of a collection infrastructure, demonstrating full cycle of re/up-cycling and glass production
